

## Localization Partner Program

This document describes the 4PSA Localization Partner program.  
For more information, please contact [docs@4psa.com](mailto:docs@4psa.com).

## Why We Need Your Help

4PSA software is used all over the world by thousands of businesses. Many of these businesses would rather offer their clients software in their native language.

A language pack is a set of files that contains the translation of the 4PSA software interface in a foreign language.

Several language packs can be installed on a server at the same time. The user can choose their target language from their account preferences setup or at sign-up.

**Language packs are free of charge.**

We need help from the community to provide accurate translations and localizations and **we are prepared to support** our partners.

## How You Can Help

- Translate the 4PSA software language pack in your native language.
- Translate the 4PSA software help files in your native language.
- Update the translation when new versions are released.
- Verify your translation by accessing different sections of the interface and ensure that there are no inconsistencies between the target language and the source text.
- Upload the translation files to the Translators Zone
- Review, comment, and improve other partners' translations.

## How We Support You

- You receive a 15% discount on all 4PSA software license purchases.
- You get access to the fully-featured community area dedicated to translators who can share, review, and submit their translations for approval.
- You gain recognition in the 4PSA Partners Area.
- We provide the software tools to automatically detect translation issues.
- We provide the software tools to automatically track the differences between disparate 4PSA software versions for both the language pack and the help files.

## Joining Requirements

- The localization partner must be an established business with a proven track record.
- High level of technical translation skills are required.
- The localization partner must have the technical means to perform and support the translation.
- The localization partner must be able to meet the schedule.
