

4PSA VoipNow Translation Partner

This document describes the 4PSA VoipNow Translation Partner program.
For more information please contact docs@4psa.com.

Why Do We Need Your Help

A language pack is a set of files that translate the 4PSA VoipNow interface in a foreign language. The administrator can install on the server as many language packs as he wants. Rack-Soft does not charge 4PSA VoipNow customers for language packs.

The regular 4PSA VoipNow user can choose the language in his account preferences setup or at sign-up.

We need the community's help in order to provide accurate translations and localizations and **we are prepared to support** our translation partners.

What Do You Have to Do

- Translate 4PSA VoipNow language pack and help files in your native language
- Maintain the translation when new versions are released

What Do You Get

- One **free** 4PSA VoipNow unlimited license (after first translation release)
- 15% off to all 4PSA VoipNow license purchases
- Recognition on 4PSA website Partners Area
- Software tools to automatically detect translation issues

What Do You Need in order to Join

- The translation partner must be an established business with a proven track
- The translation partner must have the technical means to perform and support the translation
- The translation partner must be able to fit into the schedule

Is Everything OK?

Contact docs@4psa.com and send us more information about you.

We are eager to start working with you!
