

Certified VoIP Manufacturer Program

For VoIP phone, VoIP hardware and server manufacturers

Program Overview

4PSA is continuously searching for the hardware that will give our customers the best experience while using the VoipNow Platform.

We certify only high-quality products that enhance software utilization. The 4PSA Certified VoIP Manufacturer logo is proof of 4PSA's faith in the product and a symbol of our partnership with the device manufacturer.

Periodic Testing

Both technology and the market are constantly evolving and so are our requirements.

For this reason, 4PSA certified VoIP products must be retested for all major VoipNow Platform releases. Certification tests are free of charge.

4PSA VoipNow is currently interoperable with Citel Technologies' Portico TVA, Panasonic's KX-UT and KX-TGP SIP Phone series, Yealink's entire line of SIP phones and Snom's full suite of IP desktop phones.

Take Full Advantage of Your Certification

Use the 4PSA Certified VoIP Manufacturer logo for approved products, packaging, and associated marketing materials.

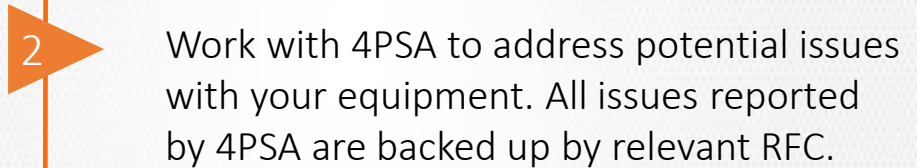

Participate in VoipNow events, promotions, and marketing initiatives.

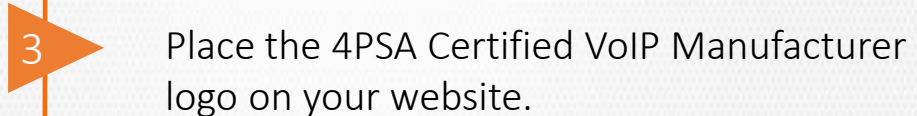

Get your equipment recommended by 4PSA sales team.

Let customers know that your product is fully compatible with VoipNow and receive recognition in the 4PSA Partners Area.

How to receive certification for your products

- http://www.4psa.com/company-partnerapply.html?program=voipcertified then submit your product for testing." data-bbox="257 338 893 445"/>

1 Start by completing the online application form: <http://www.4psa.com/company-partnerapply.html?program=voipcertified> then submit your product for testing.
- 

2 Work with 4PSA to address potential issues with your equipment. All issues reported by 4PSA are backed up by relevant RFC.
- 

3 Place the 4PSA Certified VoIP Manufacturer logo on your website.
- 

4 Join 4PSA in a press release or case study.
